AUTUMN LIST
OF
DUTCH BULBS
AND
HARDY LILIUMS

OFFERED BY
WILLIAM N. CRAIG
340 FRONT STREET
WEYMOUTH, MASS.

The bulbs offered in this list are of the very best quality procurable and the Dutch stock has been directly imported. I would respectfully invite an inspection of my bulbs, and urge early buying as the advance orders are this season unusually heavy, especially on varieties which cannot be imported after the present year. After January 1, 1926 the only bulbs which the Federal Horticultural Board will allow the importation of, except in limited numbers for propagating purposes for which special permits are necessary, will be tulips, hyacinths, crocus, lilliums, and lily of the valley. As there is no considerable domestic supply of the various bulbs to be debarred, and as the quality will be inferior and price much higher than for imported stock, flower lovers would be well advised to purchase as liberally as they feel they can afford this autumn. Only varieties of proven excellence and of a moderate price are offered.

HARDY LILIUMS

Liliums are one of my leading specialties and a large proportion of those offered are home grown in Weymouth. Planting of Lili-ums can be successfully done in both fall and

spring but fall is preferable. *L. candidum* requires to be planted earlier than other varieties, of these latter I have a superb stock of bulbs. Imported bulbs of *speciosum*, *auratum* and one or two other varieties do not usually arrive until late November, but if ground is mulched to exclude frost they can be planted as late as Christmas. All liliiums require well drained ground and are better planted deeper than they usually are. *L. candidum* is best covered no more than 4 inches but other varieties should have 6-10 inches of soil over them.
